

Who are we?

Ever Young Natural Foods is a New York Company (Pride of New York certification) that provides cutting edge health foods to the community.

To ensure that we remain on the cutting edge, we support research on the relationship of nutrition to chronic diseases such as cancer and cardiovascular disease. One program, at the University Of Rochester Medical Center, is a study of the effect of algae phytochemicals on the suppression of cancer cells.

Our on-going research shows great promise for the use of these algae in future products that aide in prevention of chronic diseases, such as cancer and cardiovascular disease. Also for the use of them in food products that are not only highly nutritious but diabetic friendly.

Visit us at: www.everyoungnaturalfoods.com
for further information and scientific references regarding the alga species of the Diet Enhance™ blend.
Under the Science tab, there are several sections that I believe you will find interesting.

ADDRESS

EverYoung
natural foods™

What is it?

EverYoung blends consist of all natural, organic algae. The natural, organic aspect assures freedom from pesticides and products that are maximally bio-available for superior absorption and use by the body. Natural also implies that all associated enzymes that support phytochemical activity will work together as nature intended – coupled synergy. There are no synthesized phytochemicals in DietEnhance™.

DIET enhance™

EverYoung Natural Foods is proud to offer our customers the first systemic health food, Diet Enhance™.

It will significantly improve the major health indices of your favorite foods in a convenient and portable dispenser. Studies have verified that algae – an organism that is at the beginning of our food chain – **does significantly lower the glycemic and lipidemic index of the food** it is added to without a noticeable change in taste. Its high antioxidant levels protect against the damage caused by today's environmental pollutants, and "injury and illness".

It also helps the healthy consumer to obtain essential nutrition from their daily foods that more closely approximate USDA standards.

Good News For Vegetarians!! The algae in our blend provides the Recommended Dietary Allowance (RDA) of Vitamin B-12. This is one remarkable nutrient that has been described as only available in meat and fish. One daily serving of Diet Enhance™ will provide the RDA.

The novelty of Diet Enhance™ dictates that it be offered to a limited number of customers in order to assess demand for future production and distribution. We fervently request input on your experience with the use of this product and improvements suggested will help our goal of providing the perfect health food.

So, be the first to experience the benefits...

By purchasing a 30 day supply in our convenient shaker bottle. Its portability and convenience allow you to carry it with you where ever you go. We are sure you will agree it is difficult to put a value on good health.

But one thing is for sure...

Healthy Food + Exercise = EverYoung

we make **FOOD**
HEALTHIER™
